

# DIPHACIN 120

## UNIVERSAL CONCENTRATE RODENTICIDE POWDER

Kills rats and mice  
Anticoagulant for rodent control  
COMMERCIAL

Only to be used by certified pest control operators, farmers and persons authorized in government approved pest control programs.

### GUARANTEE:

Diphacinone (present as sodium salt) .....0.106%  
2-Diphenylacetyl-1,3-indandione

Registration No. 11592  
PEST CONTROL PRODUCTS ACT  
EPA Est. No. 61282-WI-1

**READ THE LABEL BEFORE USING**  
**KEEP OUT OF REACH OF CHILDREN**

### PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN, PETS AND LIVESTOCK.

May be harmful or fatal if swallowed or absorbed through the skin. Chemical-resistant gloves must be worn when handling product and when disposing of dead rodent, unconsumed bait and empty containers. Avoid contact with eyes, skin or clothing. Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet. Wash skin thoroughly with soap and water after handling. Wash contaminated clothing, separately from other laundry, with soap and hot water before reuse. **KEEP AWAY FROM FEED AND FOODSTUFFS.** All handlers must wear long-sleeved shirt and long pants, shoes plus socks, and chemical-resistant gloves. Wear a NIOSH-approved particulate-filter respirator and protective eyewear while pouring and mixing the concentrate with bait.

### FIRST AID:

**If in eyes,** flush with water for 15 minutes.

**If on skin,** wash with soap and water.

**If swallowed,** Give patient one or two glasses of water and induce vomiting by touching back of throat with a finger or a blunt object; repeat until vomit fluid is clear. Do not give anything by mouth to an unconscious person. For all cases of human ingestion, immediately notify a physician or poison control centre. Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

### TOXICOLOGICAL INFORMATION:

Vitamin K<sub>1</sub> in the form of intramuscular or subcutaneous injections, or by oral ingestion are suggested remedial

treatments for anticoagulant poisoning. The severity of the case measured by establishing prolonged prothrombin times (P.T.) will determine appropriate therapy. Monitoring P.T. will indicate the necessity of repeated treatments.

### ENVIRONMENTAL HAZARDS:

Keep out of lakes, streams, or ponds.

### DIRECTIONS FOR USE:

This product can be used in dwellings, farm buildings, food service establishments, granary bins (empty), processing plants (feed, food, non-food) and storage areas.

### Food processing, Food Manufacturing, Food Storage and Food Service Areas:

For areas not directly related to food processing: Use only in non-food or non-feed area where feed, food, packaging and handling equipment are never opened or exposed. For areas where feed or food is processed, served, or stored: In meat and food processing plants (processing areas), use only when plant is not in operation. Remove or cover all food, packaging material and utensils before placing bait in baiting stations. Remove all baits and dead rodent before reuse of the plant (processing areas include storage and service).

**USE LIMITATIONS:** Bait **MUST** either be placed in tamper-resistant bait stations or in locations not accessible to children, pets or livestock. **DO NOT** place bait in areas where there is a possibility of contaminating food or surfaces that come in contact with food. Users should remove clothing immediately if pesticide gets inside. Then wash skin thoroughly and put on clean clothing.

To ensure safe use of this product, tamper-resistant bait stations must have the following characteristics:

- constructed of high-strength material (e.g., metal or injection moulded plastic) and resistant to destruction by children and non-target animals;
- entrance designed so that children and non-target animals cannot reach the bait;
- internal structure that prevents bait from being shaken loose;
- access panel that fastens securely and lock (e.g., metal screw or padlock);
- capable of being securely fastened to a surface (e.g. nailed down); and
- clearly labeled: "WARNING POISON".

**BAIT PREPARATION:**

May be used wet or dry. To prepare liquid baits dissolve 48 g Diphacin 120 Universal Concentrate Rodenticide Powder in 1 L of water. To prepare dry baits mix one part by weight of concentrate with 19 parts of a suitable substrate such as cornmeal or rolled oats to give a 0.005% bait. Place bait in locations frequented by the rodents, such as tunnels, feeding areas, and runways. Liquid baits should be exposed in glass water founts in protected stations. For RATS, use a minimum of 250 g of bait per station increasing the amount if a heavy infestation exists. For MICE, set out piles of 15-60 g at intervals of 2-3 m. Replace bait which becomes damp or moldy. Maintain an uninterrupted supply until feeding ceases.

**STORAGE:**

Store in a cool, dry place away from other chemicals and food or feed. Store product not in use, in original container, in a secure location inaccessible to children and non-target animals.

**DISPOSAL:**

Do not reuse empty container. Dispose of unused or spoiled bait in accordance with local requirements. Follow provincial instructions for any required cleaning of the container prior to its disposal. Make the empty container unsuitable for further use. Dispose of container in accordance with provincial requirements. For more information on the disposal of unused, unwanted product and the cleanup of spills, contact the **Provincial Regulatory Agency or the Manufacturer.**

**RODENT DISPOSAL:**

Dispose of dead rodents in garbage or by burying.

**NOTICE TO USER**

This pest control product is to be used only in accordance with the directions on the label. It is an offence under the *Pest Control Products Act* to use this product in a way that is inconsistent with the directions on the label. The user assumes the risk to persons or property that arises from any such use of this product.
